

TY-X02 Product Specification

10.1-inch all aluminum fully enclosed wall mounted all-in-one machine

Product Introduction.

The wall mounted all-in-one machine adopts a [all aluminum fully enclosed+extruded back cover] structural design, with no fan passive heat dissipation, and wall mounted or desktop installation solutions. In terms of design, we pay more attention to its reliability, adaptability to the environment, scalability, and other aspects. Multiple CPU configurations with multiple combinations. Develop IO interfaces to meet various application requirements.

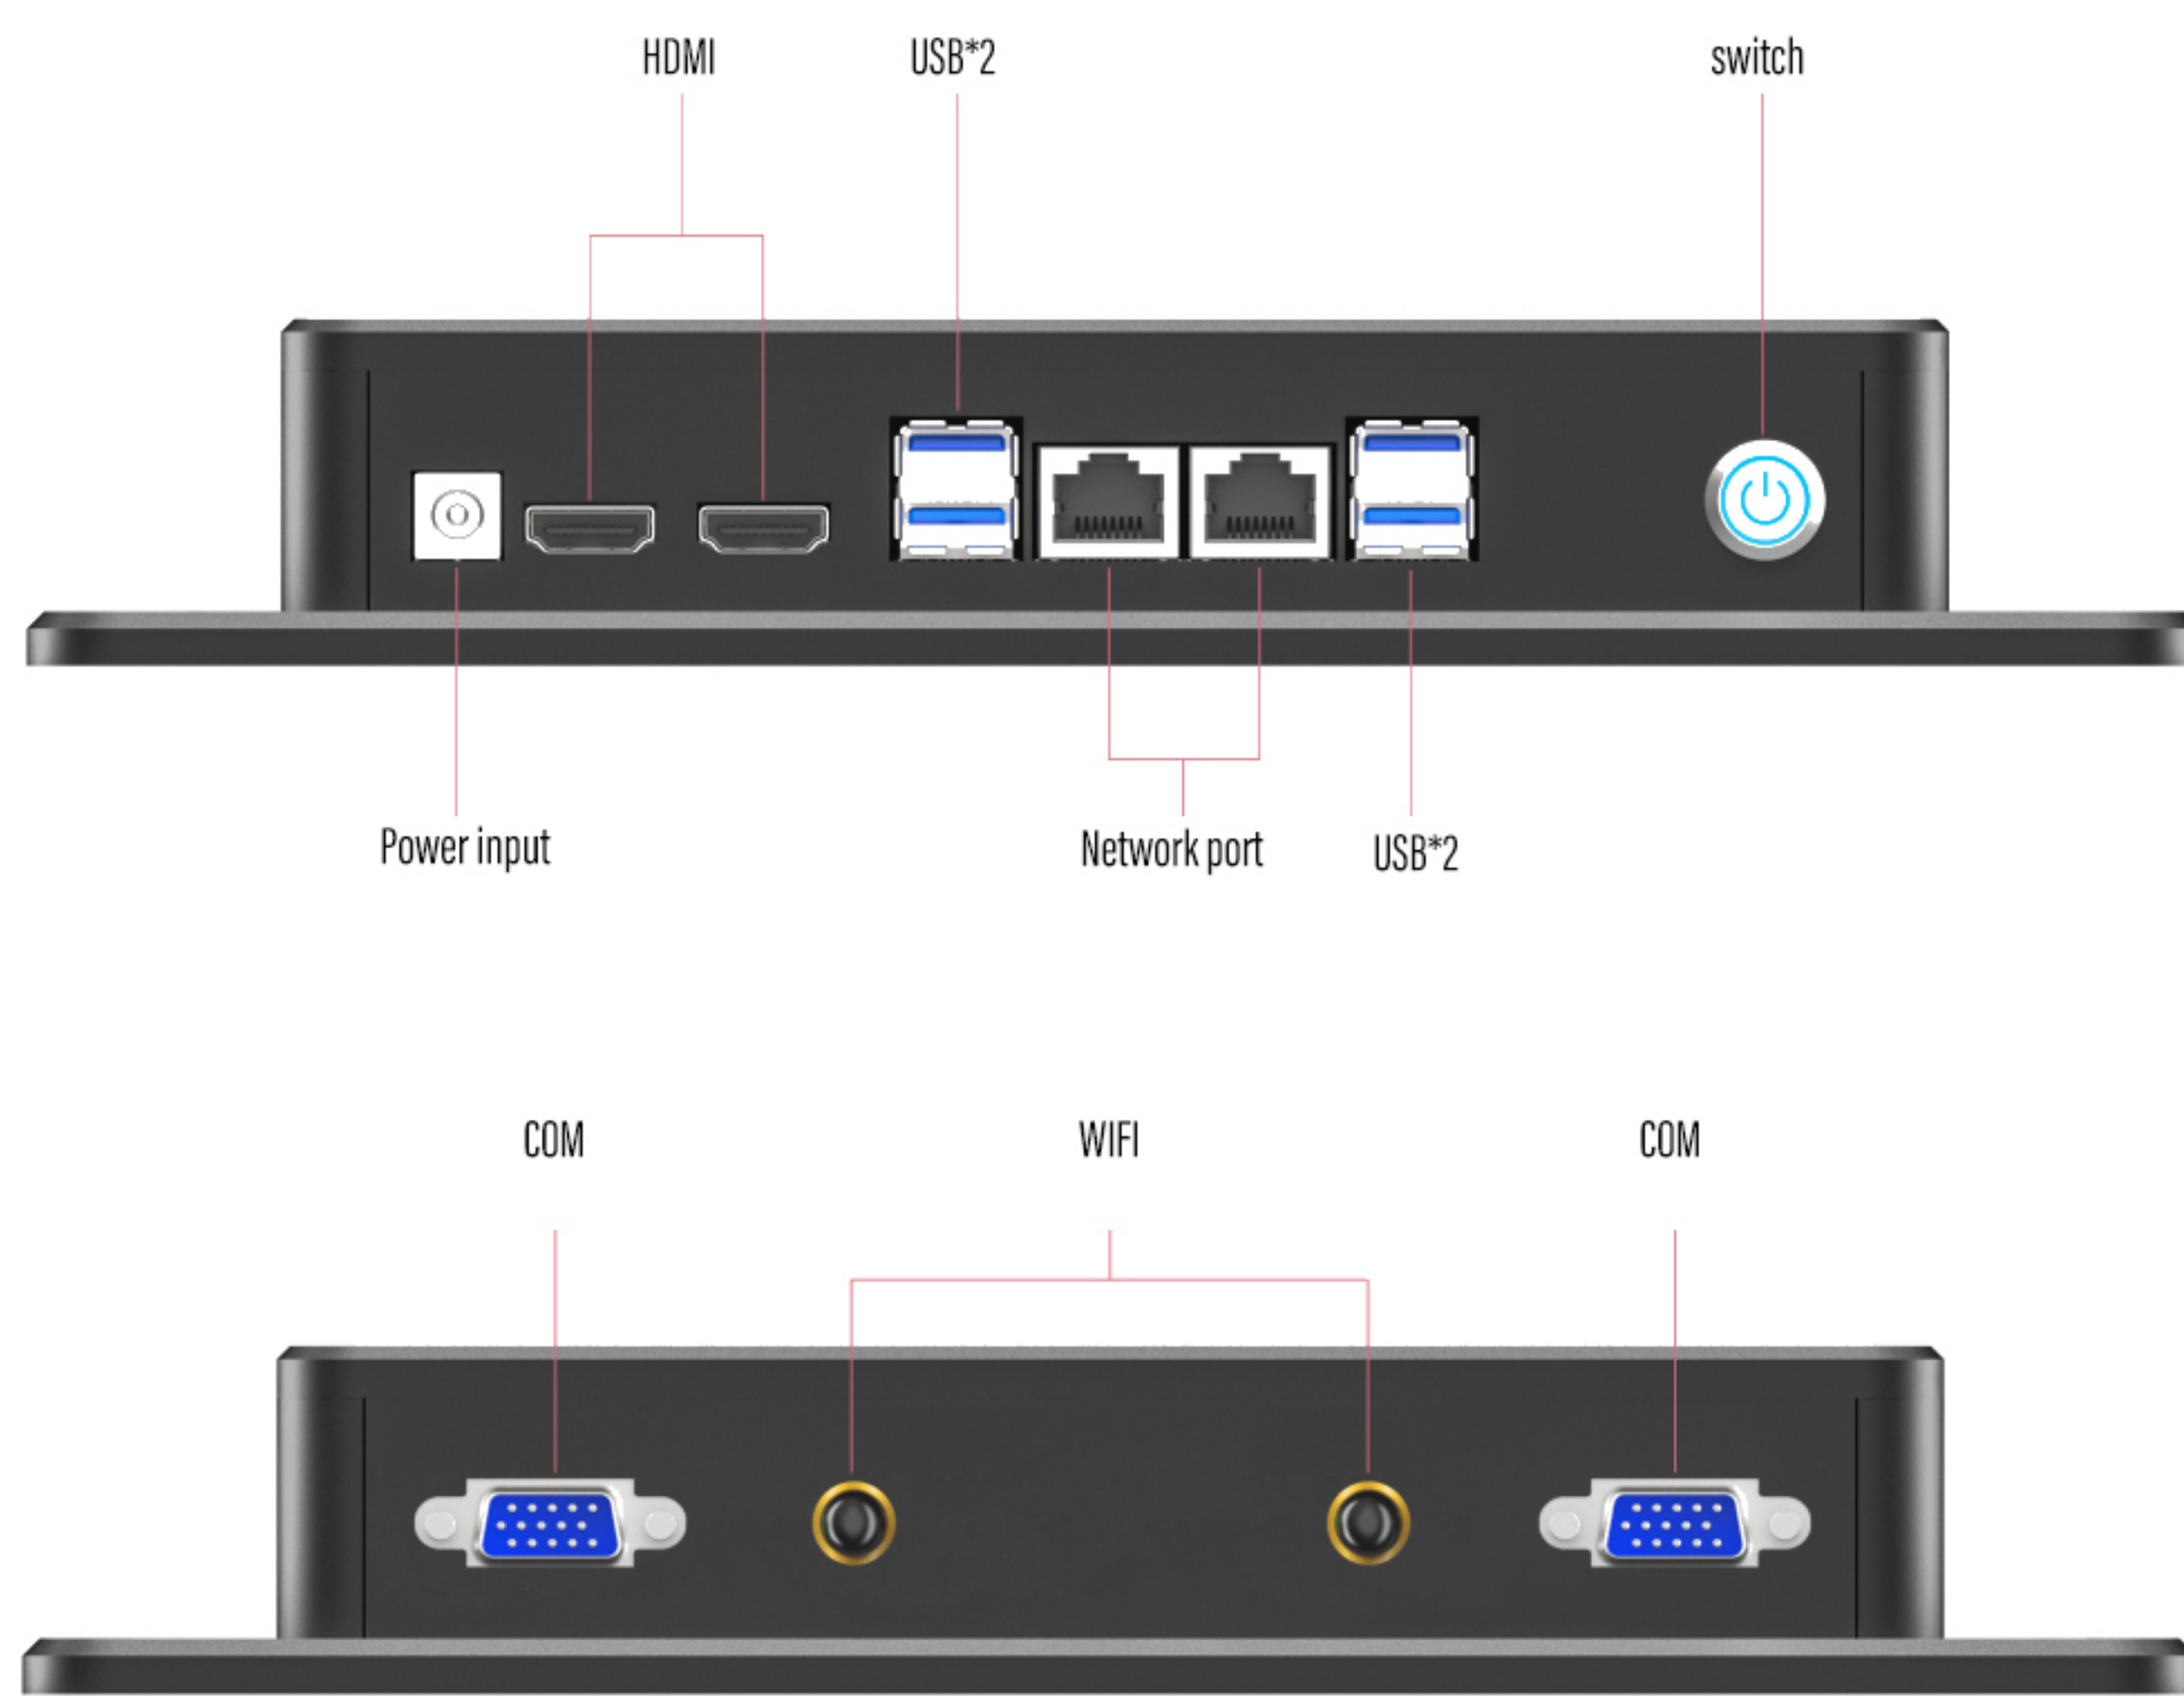

Wall mounted or desktop installation, narrow border design, can integrate the all-in-one machine with the cabinet for easy installation, simple and beautiful.

Advantages: ① All aluminum fully enclosed design, solving the problems of large factory dust, screen dust entering, and machine dust entering; ② All aluminum extrusion back cover+oxidation process to solve the problem of cooling and freezing of industrial control computers; ③ The surface of the touch panel is waterproof and anti fog, solving the problem of returning to the South Sky touch screen. There is a steam problem, ④ the overall appearance of the machine is ultra-thin, and the touch screen has an ultra narrow edge design; The overall industrial control computer has few screws, and the screw technology cannot be seen from the appearance. The colors are silver and black, making the industrial control product more distinctive.

Product Parameters

Whole machine parameters	
model	TY-X02
size	10.1 inches
Overall size	2533*163.3*50mm
Packaging size	300*231*84mm
appearance	Fully enclosed aluminum casing
